8. **AO BODY** - Interactive 2D body visualization platform

There is an overwhelming amount of holistic equipment available on the market today for health analysis, energy clearing, disease diagnosis, reversal of electromagnetic effects on the body, scalar wave generators, etc. and the public at large is at a loss to find a reliable device that is thorough, consistent, and repeatable.

Most of these devices aim to impress their clientele either with a user interface that is incomprehensible, or subject to interpretation and human folly. Simply put, you shouldn't need a formal education to be able to use and interpret your device.

The **AO Scan NLS Digital Body Analyzer** is revolutionary for the reason its name implies. It is the beginning and the end of a thorough physiological and emotional analysis, right there on the spot. With a collection of cutting-edge analytical devices, the AO Scan can give you a profound insight into your physical and emotional states, by getting its information from the feedback from your brain, your voice, your muscles, and your electromagnetic current.

The modules in the **AO Scan** use various avenues of feedback to give you the best report possible, and whom-ever else you might be working with. In this way you will arrive at the most sound conclusions about your body in the quickest and most reliable way possible.

We have learned through experience in the industry that no one device can be a final, tell-all resource when dealing with the subtleties and nuances of the human body. Therefore, different snapshots from different angles provide the clearest picture as to what's going on inside the body.

The best part is that the interface is totally user friendly, and the programs do the analyzing for you (as well they should).

This minimizes operator error to virtually zero, while at the same time giving you in less than a half hour, a completely insightful report that will send you into a journey of self-discovery and self-repair that will take you as far as you wish it to.

**PHYSIOLOGICAL
EMOTIONAL
analysis**

And speaking of wishing, once the scans are complete, the journey just begins as you discover the endless possibilities offered by the **S.E.F.I.** It is a “scalar energy” Zero Point generator, one of the most powerful on the market.

This module utilizes subtle waves of energy to reprogram the patterns of disharmony in your life and the lives of others. To be used with the utmost responsibility, this device greatly enhances the subtle waves that guide your physiology, emotions, and personal development at a universal level. The results are truly astonishing.

All in all, the AO Scan Digital Body Analyzer brings the:

- Most clear personal analysis,
- Strongest subtle energy generator,
- Easiest-to-use modules.
- Most affordable and fairest price on the market.

I have dealt with high blood pressure since my 20's and I am currently 45 years old. I also have dealt with a heart condition call Supra Ventricular Tachycardia. I heard about this new technology and Kevin did a scan with the AO Digital Body Scanner and found some issues with my heart so we focused on that. Since my scan and frequency optimization my blood pressure has been great and I have not seen any symptoms of Tachycardia, it has been over 5 months.

I also have had bad allergies and the vital scan pinpointed my allergies, and since the scan and

optimization I have also had some allergy relief. I'm looking forward to my next scan to see what other differences it may make in my health which has been a lifetime battle.

Thank you Kevin for making my life a much better place!

General Instruction

The AO Scan is a delicate experimental diagnostic device and should be handled appropriately. Careful consideration should be applied when setting up the AO Scan. Just like when hospitals install an MRI, special attention is employed to the construction of the room where the MRI will be housed, to keep the radiation within the room.

Similarly, special attention should also be given to where the AO Scan is set up as well. However, not to keep radiation in, but keep disruptive energies out. The AO Scan works with very subtle energies, so a room that is void of disruptive energies is ideal. Florescent light fixtures and unstable electrical power are especially troublesome and should be avoided. It is best to use a high quality electrical surge protector for both the AO Scan as well as the S.E.F.I. and AO Lab Units, even better would be a U.P.S (uninterrupted power supply).

The AO Scan Computer Desktop

When your system boots up, you will find the desktop very clean with only a few icons.

Feel free to organize the desktop icons in any way that suits your particular needs, however, except for MS Office and/or Open Office, **adding any other programs, without prior approval, will void the AO computer's warranty.**

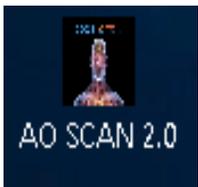

For more information concerning adding programs to your AO Scan system, please email you request to info@aoscan.com.

This icon on the desktop is an auxiliary program to enhance both the operations of the **AO Analyzer** as well as for performing remote service on your system. Both of these programs will be detailed in this manual.

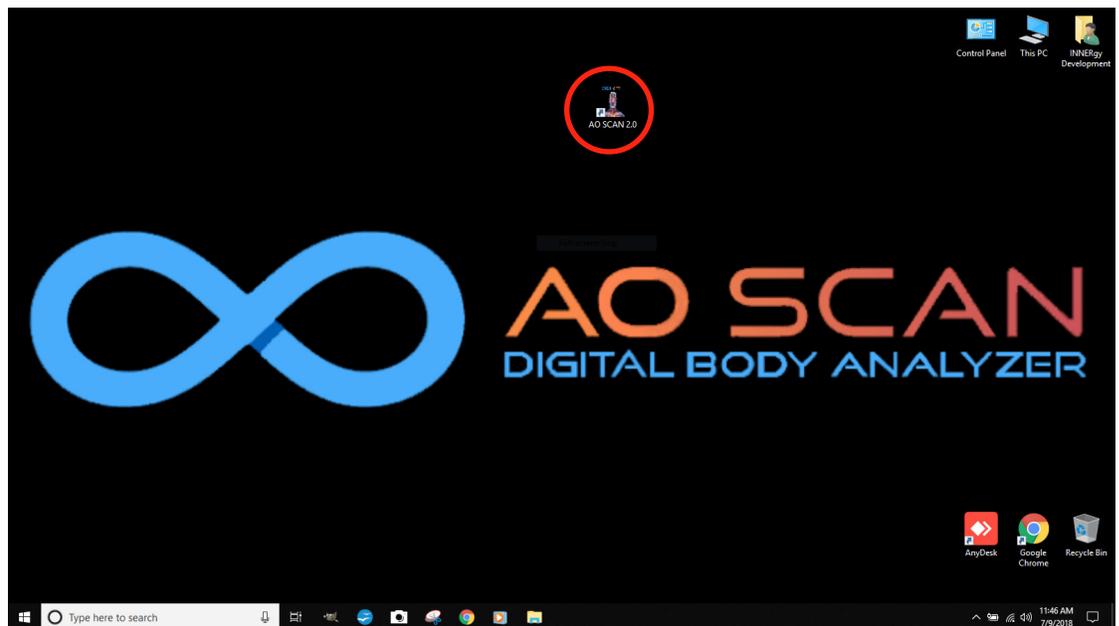

Launching the AO Scan Program

When first starting your AO Scan computer, your Desktop will look similar to this screen.

The **Control Panel** will still be in the last language, as soon as you select any program, the display will change to the **new selected language**

The AO Scan is now set up and personalized for your business. The next step is one that must be done each time you add a new client, this step is the most important step and MUST be done correctly.

Setting up a new Client

From the Control Panel Click the SELECT CLIENT button

When starting with a new client, you will need to fill out the form and click the SAVE button to save clients information.

If it's an existing client, type the last name into the Search String Box and then click SELECT CLIENT
Note: This is case sensitive. Example: **Doe** not **doe**.

Setting up a new client accurately and correctly is absolutely critical. Entering the client's information into the form must be followed exactly as indicated.

Setting up a new Client

Important Points:

EVERY field must be completed.

Gender should be a capital M or F.

Birthdate 2-digit month, 2-digit day and a 4-digit year

Email field must be filled in, even if they do not have an email address.

However, it is incredibly beneficial to the client to have an email account, because the AO Scan technician can email the scan reports to the client at the end of each session.

Phone Number needs to be entered in without hyphens

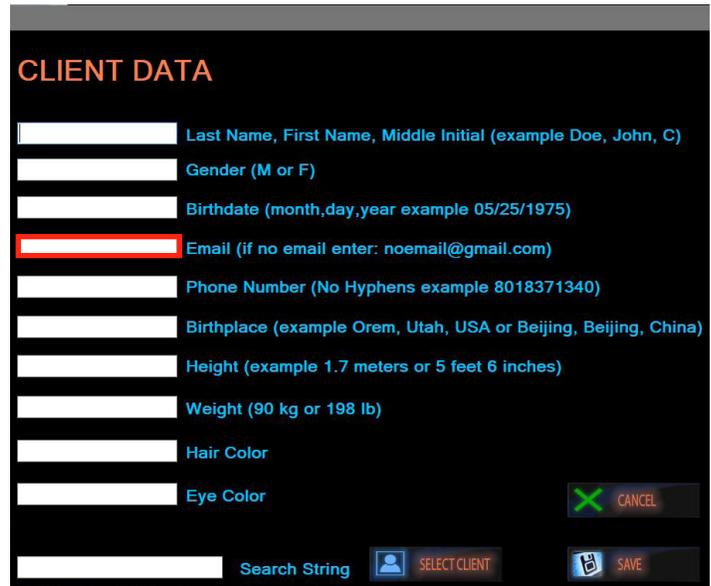

Birthplace enter city, state/province country

Height enter the feet/meter in the first box and the inches/centimeters in the second box example: 5ft 7in / 171cm

Weight the pounds/kilos example: 200 lb. / 92 kg

Hair Color is the natural color before **10-12 years old** example: Brown

Eye Color is the color before **10-12 years old** example: Hazel

Once the client's data is entered and saved, the program generates an electronic signature and computer algorithm that is unique to that specific client. This signature and algorithm interfaces directly with the AO Scan software databases in a way that is unique from all other clients.

In order for this interaction to be as pure as possible, the data must be inputted accurately precisely as indicated on the form.

The AO Scan software will interact with each client differently from all other clients based on the individual algorithms and over time will learn each client's unique reactions and responses to the AO Scans stimulus.

You can search clients by typing **directory** all lower case in the Search String.

Performing the Inner-Voice Scan

INNER-Voice technology uses the Sound Harmonizing techniques, which generates a balancing audio frequency derived from the voice spectrum excesses and weaknesses from an individual, in simple words:

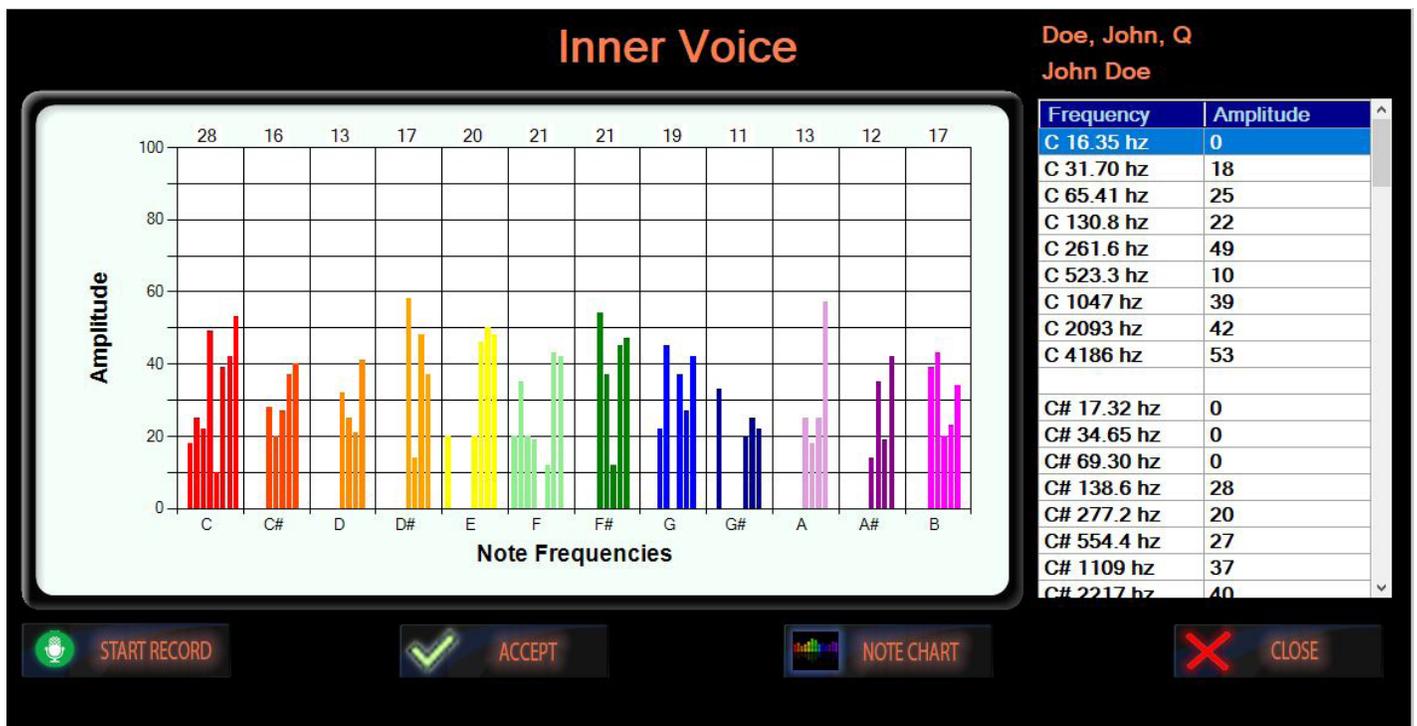

It provides all the frequencies you need and diminishes those that are in excess.

It is like hearing the ‘mirror’ of your voice.

The INNER-Voice program helps harmonizing everyday life by improving concentration, creativity and emotional intelligence

Open the program by clicking on the  icon; this will open the following window.

Once the window opens, the INNER-Voice program will load.

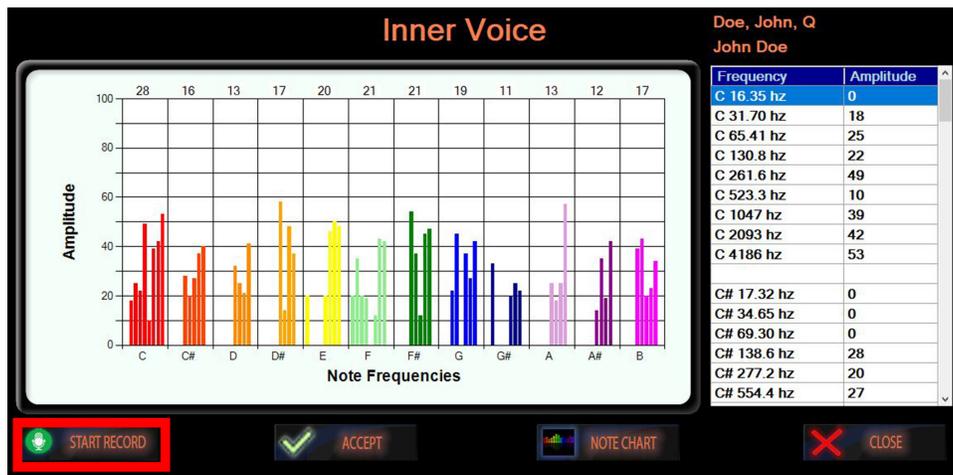

Once the program opens, the INNER-Voice Analyzing window will appear

- Place the INNER-Voice Microphone next to the client
- Prior to having the client start speaking, it is important that they are relaxed, calm and comfortable.
- Make certain that the room is quiet, and when the client is speaking, NO ONE else should be speaking.
- Instruct the client to say his/her name, age where they were born, etc., this Information comes easy and freely. Then have them just speak whatever comes easily to their mind.
- Have the client start speaking normally, what the client actually says, is not as important as having the client speak freely and from their heart.

- When the client is ready, have them start speaking then Click the record tab

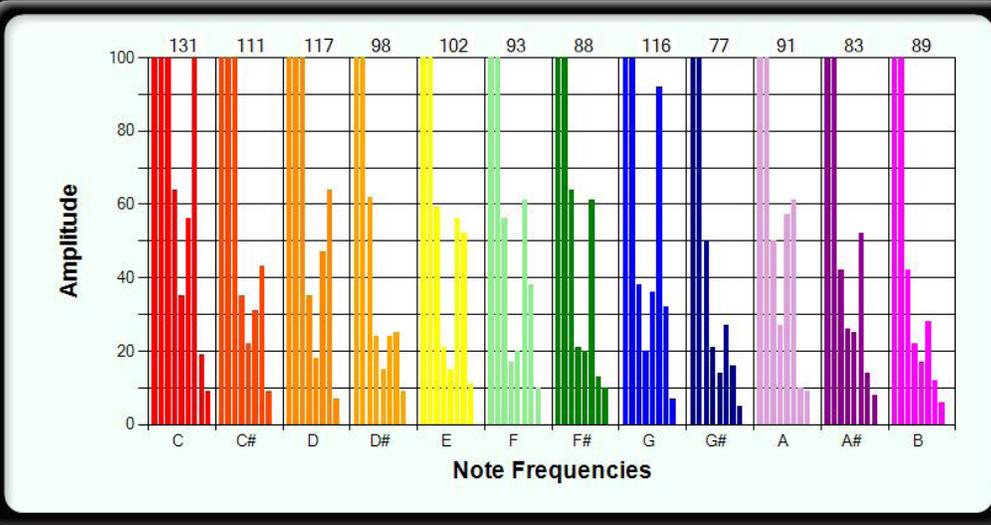

- As they speak, their voice pattern will be displayed in the spectrum box
- The Inner Voice process will stop after 20 seconds, then it will formulate the report.

Object-Referent Thinking vs. Self-Referent

Object referent people tend to base their sense of self-worth on external factors (objects), that is to say, the feedback they get from others, rather than on their own internal characteristics and attributes (personality). They often feel unacknowledged and undervalued, and are hypersensitive to the judgments and perceptions of others. These tendencies commonly originate in childhood where criticism, teasing, punishment and/or abuse from authority figures, and bullying become internalized. This can manifest in defensiveness, lack of self-trust, low self-esteem, depression, harsh self-judgment, and poor memory;

AO Vitals Scan

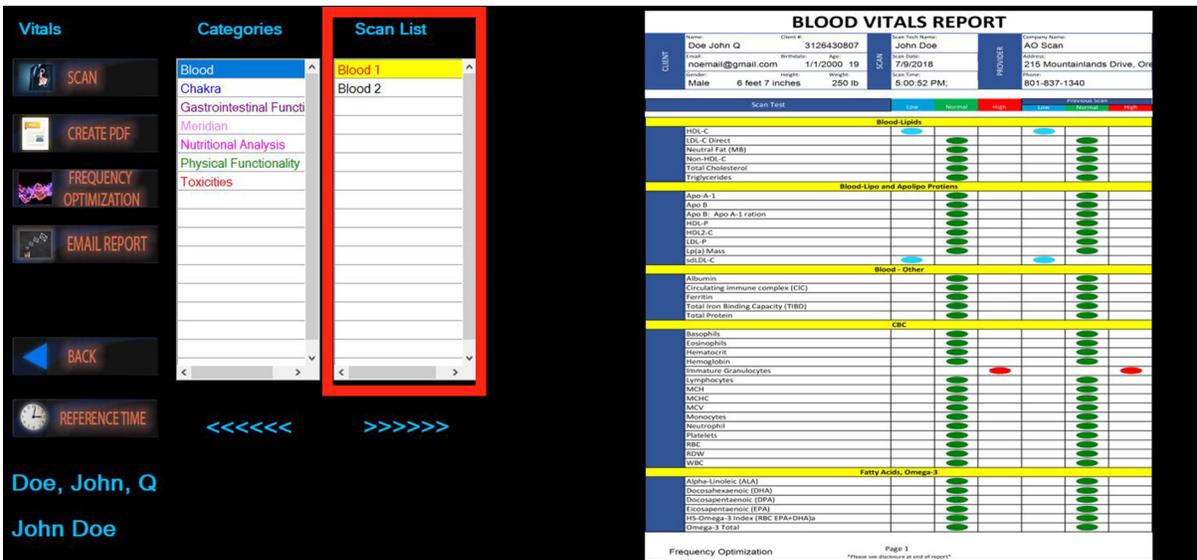

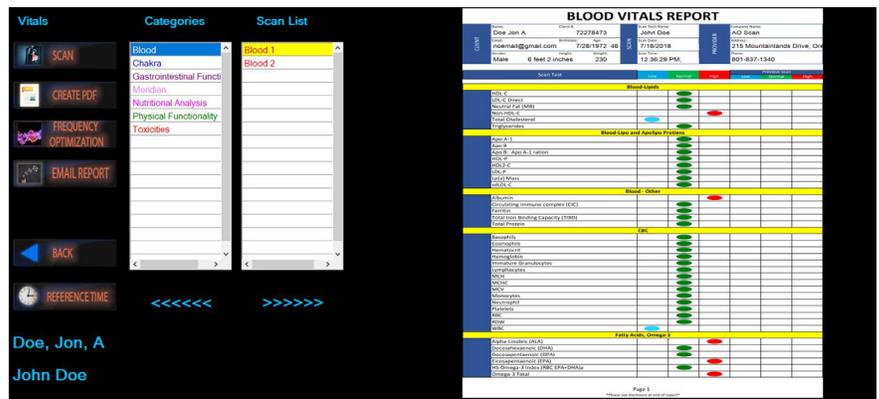

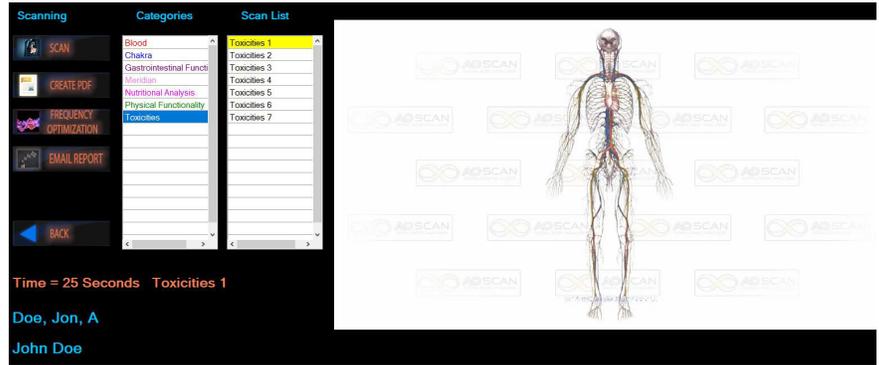

AO Vital Scan will scan all seven Categories and generate reports for each Category.

Once the Scan finishes, it will display the first Vitals Scan Report. At this point, select the **FREQUENCY OPTIMIZATION** button.

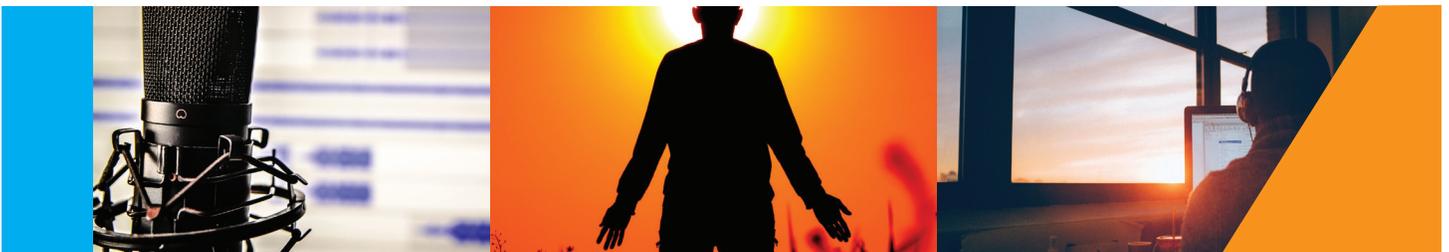

The purpose for this is to eliminate as many false positives/negatives in the report as possible. This optimization will take up to 60 seconds.

Once completed, the **FREQUENCY OPTIMIZATION** Scan report will be displayed.

The reports will be found in the **Scan List**, two to seven pages, depending on the category.

Vitals Report Explained

This report displays the first scan results to the right of the report under the heading **Previous Scan**.

The **optimized scan** results will be displayed on the left.

Reading the Report:

As in all tests, it is possible for things to be missed or incorrect results. The AO Scan is no different; unlike in regular lab tests where chemical reagents are utilized to determine results, the AO Scan compares subtle frequencies in the body.

There are billions of these frequencies in the human body and the AO Scan can currently only detect approximately 120,000 of those frequencies. So, it is possible for there to be a few false positives/negatives.

Description of the AO Comprehensive Scan

The **AO Comprehensive Scan** is safe and non-invasive. It presents detailed visual reports of the health status of the organs, systems and tissue of the body. Unlike other non-invasive scanners, the AO Comprehensive Scan shows the greater detail and can project the health status out 3-5 years.

The **AO Comprehensive Scan** is an elegant yet simple method for measuring the health state of the entire body.

It works similar to other scanners in principles of measuring electromagnetic signals and the subtle bio-frequencies, **but the brilliance here is quite literally in the details.**

AO Comprehensive Scan lists the detailed Anatomy or components of each item that it scans.

Every cell and organ in the body has its own distinctive Vibrational Frequency or Oscillation. When these oscillations are disrupted, whether by injury, diet, stress or emotion, it results in a disruption of that biological function. Which when not addressed, can bring about fatigue, depression, illness, disease and even death. Over the past 20 years, more than 120,000 of these Vibrational Frequencies have been isolated, identified and cataloged. Knowing what the optimum oscillation or frequencies of these cells and organs are, can assist in determining the root cause of an individual's health status when these frequencies are compared to the individual scanned results.

The **AO Comprehensive Scan** is a sophisticated electronic device that is capable of measuring these oscillation or frequencies utilizing the AO Scan Bio-Transducing headset.

When initiating a Scan:

1. Specific frequencies for the item being scanned are introduced to the brain;
2. The brain then responds with what that item is actually resonating at;
3. The introduced frequencies are then compared to the actual frequencies;
4. A numerical value is then determined;
5. The numerical values range from 1-9, with 5 indicating that the item is in balance;
6. The lower numbers, 4-1 generally indicate an underactive or lethargic condition;
7. The higher numbers, 6-9 generally indicates an overactive or stressed condition.

These signals are then converted into Non-Linear data within the AO Scan system, and then displayed on the computer screen.

Description of the AO Comprehensive Scan

Diseases	AO Scan	Ultrasound	C.T.	M.R.I.
Gastroenterology	74 - 86%	24 - 28%	19 - 23%	30 - 34%
Pulmonology	65 - 72%	9 - 14%	10 - 13%	23 - 31%
Gynecology	78 - 82%	16 - 18%	14 - 16%	21 - 25%
Endocrinology	52 - 65%	7 - 9%	11 - 14%	13 - 16%
Oncology	38 - 42%	6 - 8%	12 - 16%	18 - 23%

When this technology was compared with conventional diagnostic methods of Ultrasound, CT-Scan and MRI, the AO Comprehensive Scan showed to be far more accurate, see the chart above:

Client Preparations

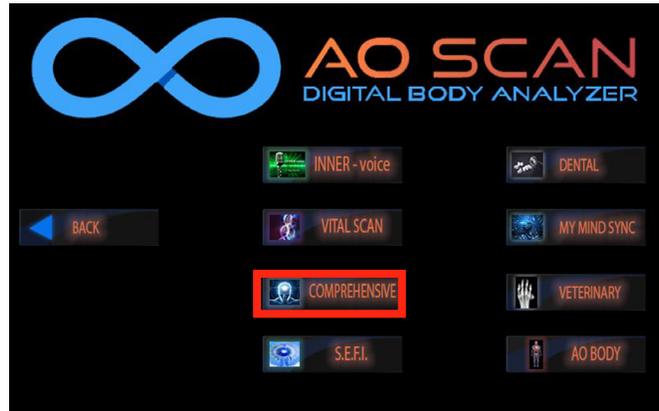

Note: For consistent and accurate results, attention must be paid to the following details.

- (1) Client should remove all electronic devices, prior to starting the scan.
- (2) No one should touch the client during the entire scanning process.
- (3) Client should not consume any stimulating beverages, medicines and preferably meals for 2 hours prior to the scan.
- (4) Clients should inform the operator of all organs that have been removed prior to starting the scan.
- (5) Client should relax for at least 5-10 minutes prior to starting the scan.
- (6) Client should refrain from unnecessary conversation during the scan.
- (7) Client should be relaxed and comfortable during the entire duration of the scan.
- (8) The AO Scan Bio-Transducing Headset **MUST** remain on the client, undisturbed for the entire duration of the scan.

NOTE: The AO Scan Bio-Transducing Headset Scans even when it is NOT on the client's head, so it must remain on the client during the entire scanning session for accurate results.

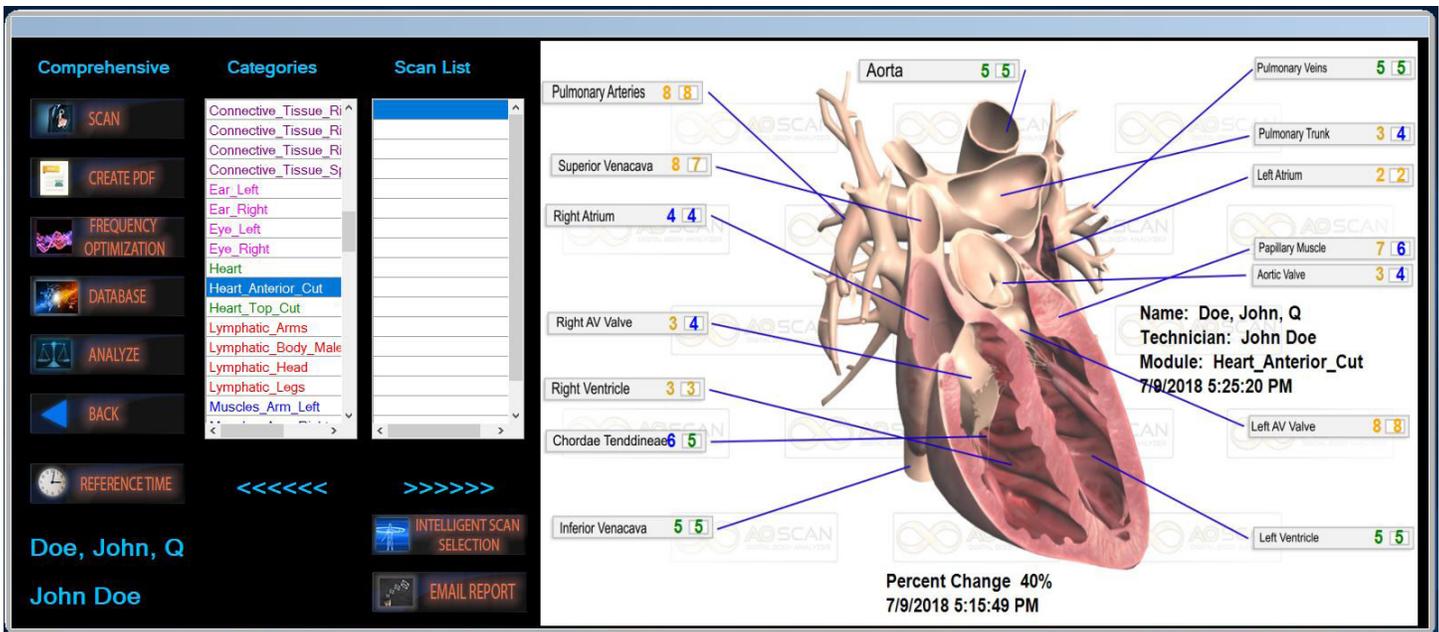

1. It is best if a **Comprehensive Scan** is kept under 1 hour.
2. For acute conditions **Comprehensive Scan** should be done daily if possible.
3. For normal or chronic conditions **Comprehensive Scan** may be done on a weekly to bi- monthly schedule.
4. Rechecking supplements via the **Analyze Function** should be done every 1-4 weeks to keep track of improvements and to determine whether the supplement is still recommended.

Understanding the AO Comprehensive Scan

To open the program Click the **COMPREHENSIVE SCAN** button

Next these 2 screens appear on

Note: Regarding Missing Organs

Although some organs may not be present, the energetic frequency (oscillation) may still show as it was at the time of the removal. The other issue is that the frequency within the brain, which corresponds to that body part, is still present, and will be read during the interpretation. Working on this area may help to repair the energy flow where the surgery or incision was made.

Explanation of Comprehensive Panel

The AO Control Panel is divided into 3 sections

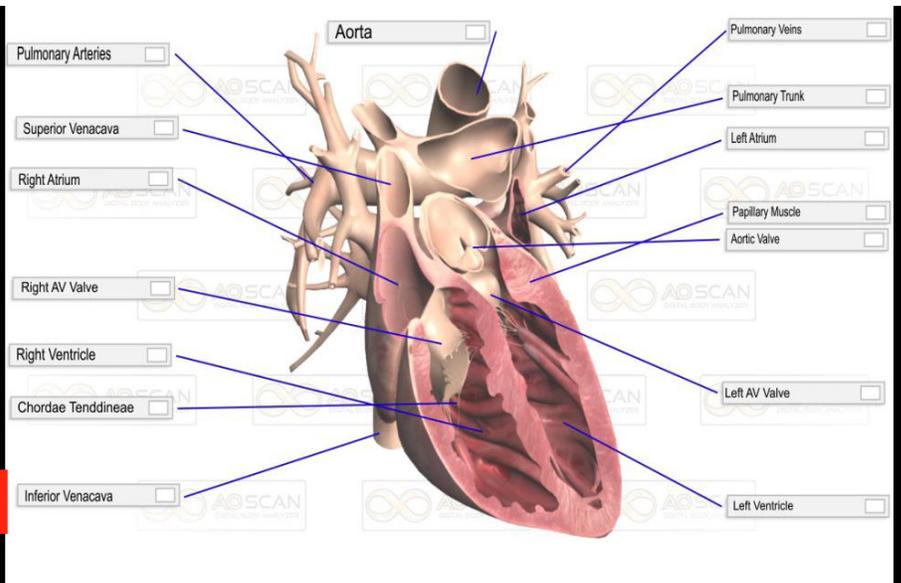

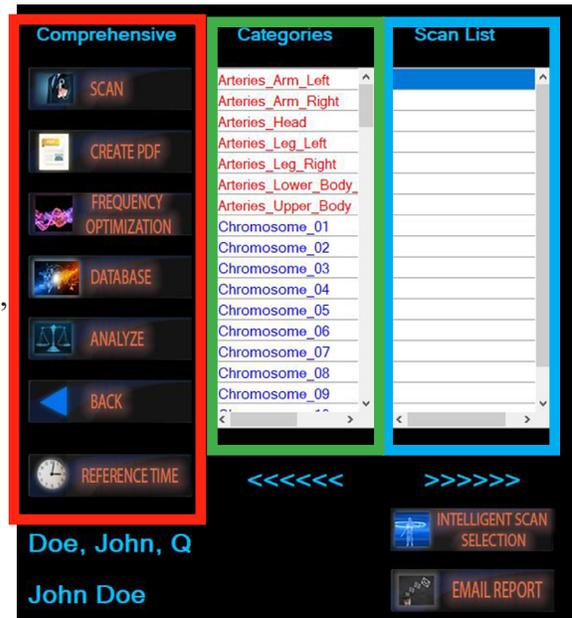

1. **Function Buttons**
2. **Categories**
3. **Scan List**

Function Buttons when clicked on initiate a specific function or access a different program.

Categories lists are all of the items available to be scanned, **double clicking** on a selected item in this list will place it in the **Scan List** Section.

Scan List shows the items that have been selected to be scanned.

Click on the **Scan List** text to **remove all items** from Scan list.

Clicking on the INTELLIGENT SCAN SELECTION would load everything found by the software from the INNER-voice and VITAL scans. (The INTELLIGENT SCAN is just a suggestion You can double click any category from the scan list to remove)

The items listed in the Categories Section are color coded to indicate a group of items, i.e.

- Arteries
- Skeleton
- Organs

However, when an item is selected and double clicked to move to the Scan List, the color in the Scan List will change to black, only if it has never been scanned.

Explanation of Comprehensive Panel

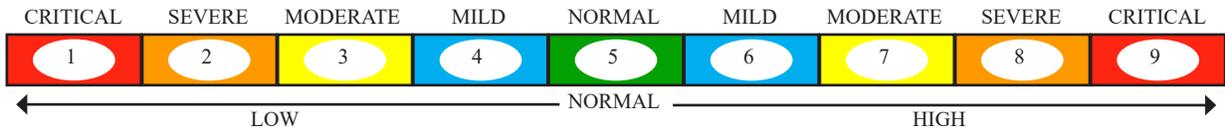

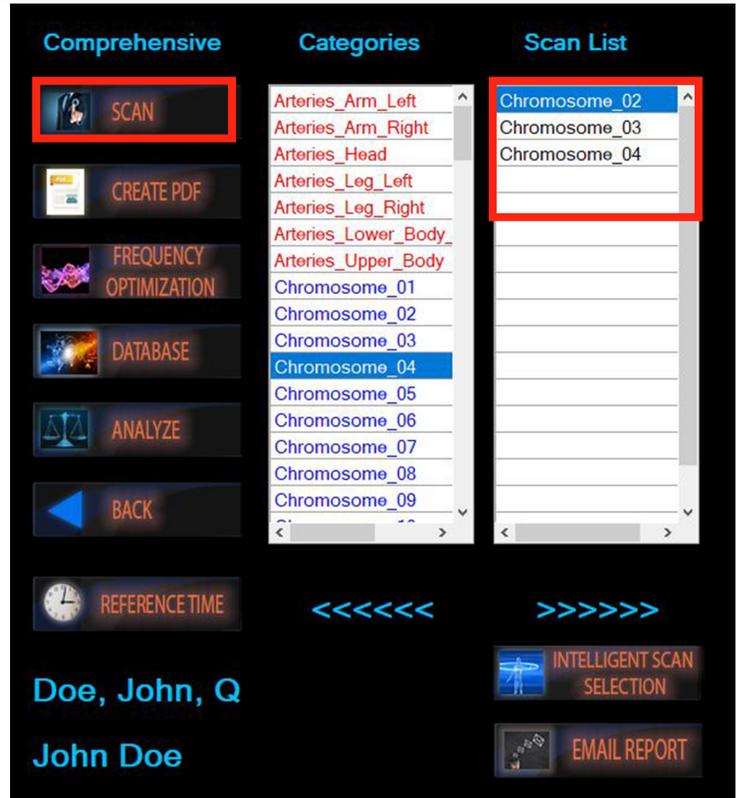

Once all the items chosen to be scanned are selected (up to 30 items at one time)

Click to begin.

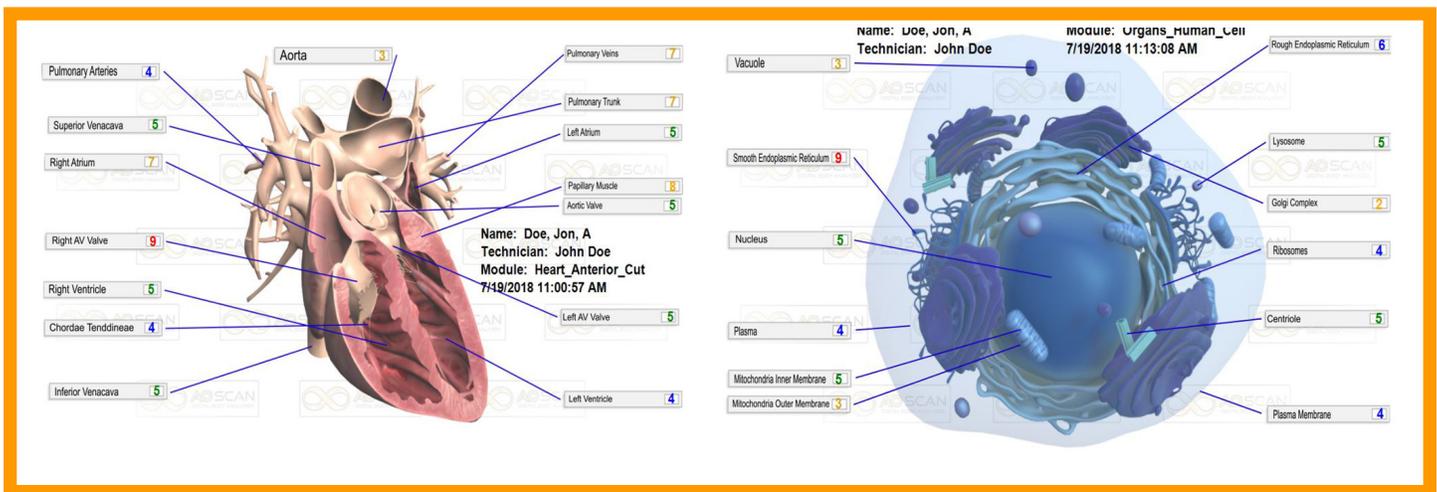

Once the Scan button has been clicked, the program will automatically begin scanning each item in the Scan List until each individual item has been scanned.

As an item is scanned, a graphic image will be displayed on the screen and specific items on the Image will be identified as they are scanned. Once the scan for that item is finished a numerical value will be given and displayed next to each specific item. See images below.

The graph above helps to determine the current condition of each test item:

NORMAL

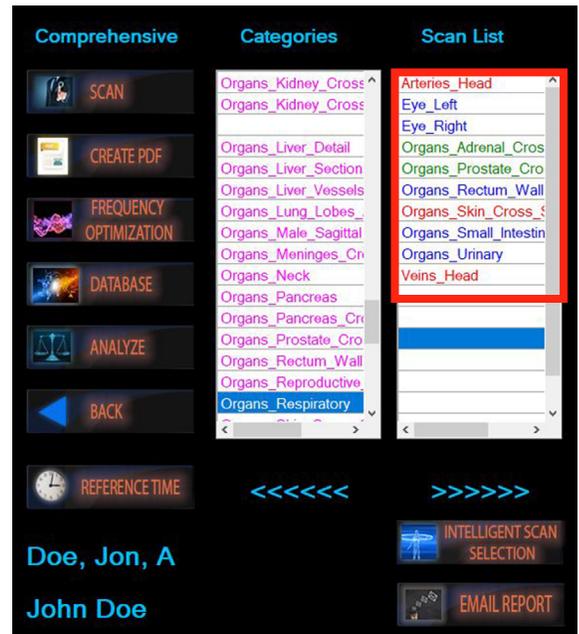

Normal is the ideal result, indicating the condition is in a healthy balance.

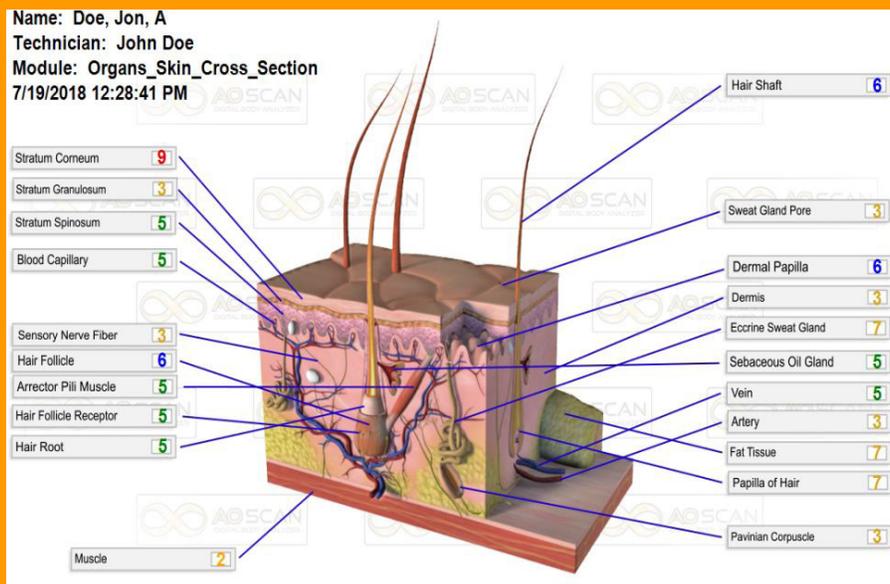

The lower numbers, 4-1 generally indicate an underactive or lethargic condition, where the higher numbers, 6-9 generally indicate an overactive or stressed condition.

Explanation of Comprehensive Panel

1. If a specific item has either a  or a  then the item name in the Scan List section will turn **RED**
2. If a specific item has either a  or a  then the item name in the Scan List section will turn **BLUE**
3. If a specific item has either a  or a  or a  or a  then the item name in the Scan List section will turn **GREEN**

The **RED** items indicate the possible areas of greatest concern, and where the focus should be concentrated on. After the scans are completed, you can click on **any item** in the **Scan List** section and the scanned images will be displayed and can be examined. Once the images have been examined, **Double Click** on the items in the **Scan List** that you will not be doing further work on. This will remove them from the list.

Once all the items that you are finished with have been removed you can determine the next steps you may want to do with the remaining items. There are two options:
Check **DATABASE**, or **Perform the Frequency Optimization**

Perform the Analysis

Click  Perform the Analysis

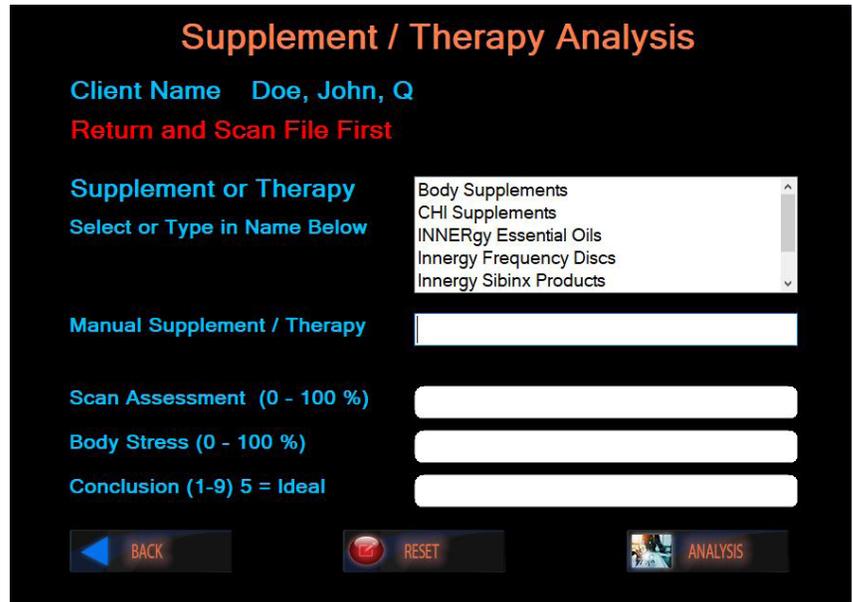

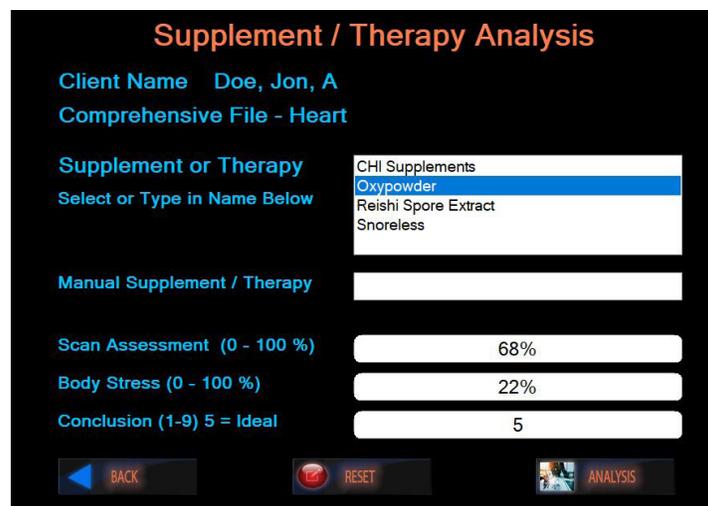

Allows you to determine what Supplement and or Therapy might be beneficial by comparing product /therapy frequencies against the frequencies in a scanned item. This function will analyze the 2 frequencies and access the potential benefit and compares it to the potential stress that it may cause to the individual client.

To perform this task.

1. First either select a category of Supplements / Therapies from the menu.

2. Or Type the name of a supplement or therapy into the Manual Supplement / Therapy box.

Once this has been done, click the  button and the program will automatically begin the analysis process and display its findings in the 3 boxes at the bottom

The first box Scan Assessment (0 – 100%) will indicate the percentage of improvement this will give.

The second box Body Stress (0 – 100%) will indicate the percentage of stress on the body this will cause.

The third box Conclusion (0 – 100%) will display a numerical value of 1 – 9, with 5 being ideal, as to the overall benefit.

S.E.F.I. (Optional Accessory)

S.E.F.I. - Subtle Energy Frequency Imprinter

AO Scan S.E.F.I.

The Subtle Energy Frequency Imprinter (S.E.F.I.) is a device designed to capture, amplify and imprint subtle energy frequencies and can either broadcast or imprint those frequencies into a target object like a sugar pill, tincture, bracelet, necklace, ring, etc.

The principle behind the S.E.F.I. is similar to making a homeopathic remedy. A homeopathic remedy has a trace amount of an herb or medicine added to a liquid, it is then shaken 10 or more times and then diluted 10 to 1. This new dilution goes through the same process 10 to 30 more times to form the finished product.

The finished product has been diluted to the point that the herb or medicine can no longer be detected in the liquid, but the energy of the herb or medicine is highly concentrated in the liquid. This finished homeopathic remedy is often more powerful and effective than the original herb or medicine.

The S.E.F.I. produces an energetic remedy not by dilution but through creating a series of Zero Point Bursts (ZPB) of energy. Thousands of ZPB's per second for up to 120 seconds.

S.E.F.I.

Zero Point Energy

A Zero Point Burst (ZPB) is when 2 identical frequency waves are played together with one of the frequencies at 180 degrees out of phase with the other one. When these 2 waves hit each other, they create what is called a Zero Point Burst and that produces a powerful burst of energy that is captured with the target.

How it Works

The AO S.E.F.I. is one of the most sophisticated and powerful units of its kind.

The method of creating the Zero Point Bursts:

1. A frequency is either delivered in to the S.E.F.I. or is captured through its unique Copy Plate.
2. The frequency is then amplified up to 100 times, and then it is duplicated in to two identical frequencies.
3. The second identical frequency is then positioned 180 degrees out of phase with the first frequency.
4. The two frequencies are then projected at each other for up to 120 seconds creating 1,000's of ZPB's per second.

The **AO Scan S.E.F.I.** is further unique in that it projects these frequencies using 4 separate projection methods, simultaneously.

1. 2 - opposing banks of 30 high intensity LED's.
2. 2 - pair of opposing audio speakers.
3. 2 - pair of opposing transducer coils.
4. 2 - opposing reflective mirrors.

The projected frequencies and resulting ZPB's are being created through:

- Light
- Sound
- Conduction
- Reflection

The end result is quite possibly the most thorough and powerful Zero Point Energy imprint device available on the market today.

The **AO Scan S.E.F.I.** is used in conjunction with the **AO Scan Vitals** scan, the **AO Scan Comprehensive** scan, the **Frequency Optimization** program and in all 13 of the **S.E.F.I. broadcast / imprint programs.**

NOTE: The S.E.F.I. can also operate as a stand-alone frequency-imprinting device.

S.E.F.I

Connecting the S.E.F.I. Unit

There are 2 connectors on the rear of the unit.

1. The Power Input Plug
2. Signal Input from the “Y” Cable on the AO SCAN unit

The S.E.F.I. takes the data from these devices and programs and converts that data into a Powerful Cohesive Energy that can then be re-directed back into the body more efficiently than when done without the assistance of the S.E.F.I.

The theories and science behind the S.E.F.I. can be found in Appendix C. The Camera is utilized in some of the S.E.F.I. programs, so we will explain how to use it here.

NOTE: It is not recommended to run the S.E.F.I. programs with the lid open, it should always be closed when in operation, and the pulsing of the LED diodes causes a strain on the eyes.

S.E.F.I. COPY & ERASE Functions

The Erase program

Prior to “Imprinting” an object or substance, you should first erase all energies that are currently attached to it...

1. Place the item you are going to “Erase” into the S.E.F.I. chamber, same as explained above.
2. Click on the “Erase” icon and the program will automatically erase the energies.
3. When the program finishes, (approx. 60 seconds) the object is cleared and ready to be “Imprinted”

The Copy program

Prior to “Copying” an object or substance, you should first Erase all energies from the receiving object, see above instructions.

Make sure that the item that is to be “Imprinted” is placed on the “IMPRINT” plate

Press the “Power” button into the “ON” position.

Place the substance that is to be copied, onto the “COPY” plate

After Follow the Making a Remedy instructions on the previous page

Place the substance that is to be copied, onto the “COPY” plate

Click on the “Copy” icon and the program will automatically Copy the frequency oscillations of the substance into the object or substance that is either in the S.E.F.I. Chamber or on the IMPRINT plate.

When the program finishes, (approx. 60 seconds) the frequency oscillations of the substance in the “Copy” have been “Imprinted” into the substance or object that is in the S.E.F.I.

Acoustic Light Wave

The **Acoustic Light Wave** is a state of the art **plasma discharge tube**, that is powered by a high frequency audio broadcast circuit that produces an **Extremely clean and pure Signal**

This unit is based on the work of **Dr. Royal Rife** and has been duplicated as close as possible to the original system designed by him except that it has been redesigned using the modern electronic components that are available today.

Doctor Royal Raymond Rife claimed to have documented a “**Mortal Oscillatory Rate**” for various pathogenic organisms, and to be able to destroy the organisms by vibrating them at this particular rate.

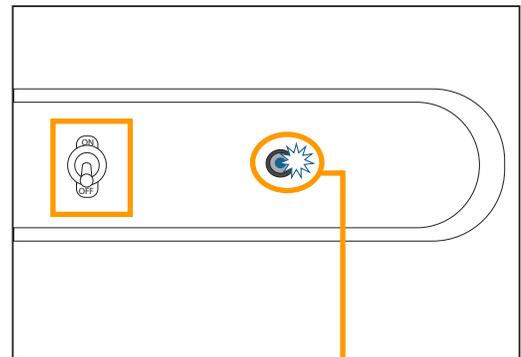

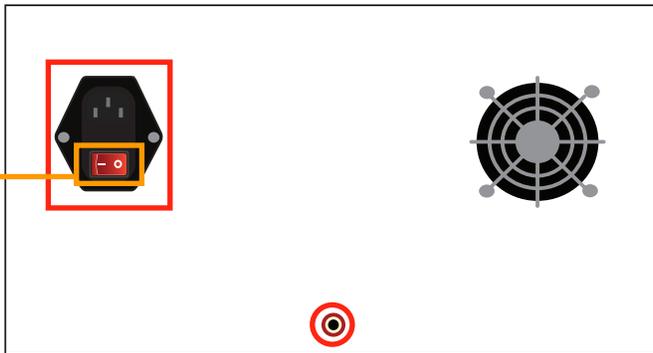

According to the San Diego Evening Tribune in 1938, Rife stopped short of claiming that he could cure cancer, but did argue that he could “**devitalize disease organisms**” in living tissue, “with certain exceptions”.

Acoustic Light Wave

The **plasma tube**, when modulated, is normally energized by whatever high-voltage source is used and is coupled to the tube. When the modulation is applied on the high-voltage, the plasma lamp turns on and off at the same rate as the modulating frequency, as an example, 1000 cycles per second, or 1000 Hertz. Each time the audio modulation turns on, the voltage across the lamp is increased, causing the lamp to also turn on. Plasma lamps don't just "turn on", there is a very short amount of time where the plasma is switching between ignition and not-quite ignition, and that switching transient time is both visible on a high-frequency oscilloscope, and important to the functioning of the Rife machine.

There are many theories as to why the **plasma tube** disables or devitalizes pathogens (germs). It has been experimentally determined that the energy from the plasma lamp goes through walls (so the Rife effect is not light or photon energy), and there are suggestions that heavy aluminum foil or aluminum sheet metal may act as a reflector for the energy, but that other metals don't appear to be effective reflectors for the Rife energy.

When the **Acoustic Light Wave** is attached to the **AO Scan**, the frequency matrices it generates can then be broadcast through it providing an additional form of supplemental therapy.

The **Acoustic Light Wave** also works as a stand-alone system.

AO SCAN LAB

The **AO Scan Lab** is an optional accessory exclusively for the AO Scanner.

It replaces the clients Bone Transducer Headset in performing scans and allows a scan to be completed with a client's Hair, Saliva and Urine.

The **AO Scan Lab** is perfect for offices that focus more on providing a scan and report service for other practitioners and clients that do not live in close proximity to the office.

These kits are sent to the clients, where the client would fill out the form, select the tests they want performed, obtain the samples and then return the finished kit to the practitioner. Once the kit is received, the client information would be entered in to the AO Scanner, the 3 samples would be loaded in to the AO Lab receptacles and then the selected tests would be (AO Lab Kit includes) The client information form, A bag for 3 hairs with a root attached, A plastic specimen tube Saliva.

AO SCAN LAB

AO Lab kits include:

The client information form,
A bag for 3 hairs with a root attached,
A plastic specimen tube for Saliva.

How the AO Scan Lab Works

The Lab unit connects to the AO Scanner where the Bone Transducing Headset would normally be connected.

Within the AO Lab unit are specially tuned induction coils positioned directly under each specimen receptacle. These coils are designed to pick up and amplify the frequencies in the Hair, Saliva and Urine provided by the client the same way the Headset would if it were placed on the client.

The amplification of the frequencies is accomplished via the movement of energized liquid that is constantly flowing beneath each coil and passing through a SibinX* filter and cooling system. The SibinX filter energizes the liquid with negative ION's and Far Infrared energy.

*SibinX is a mineral compound found in the remnants of a meteor that struck China millions of years ago. This mineral naturally produces Negative ION's and Far Infrared energy and is not found anywhere else in the world.

AO Scan Remote

Performing remote session with the AO Scan is only possible with the optional Remote Module, You the AO Scan owner will need to purchase an annual license. A discounted license is available from Innergy Development, LLC contact them at. 888-429-0082

Establishing a remote session:

1. Set up a time with the client who has purchased a Remote Module
2. Instruct the client to download the program AnyDesk from www.anydesk.com

This is a free program for the client as long as the AO Scan owner has a license.

It will take them to this Page

Click on the “Download” tab

3. Instruct the client to “Click” on their AnyDesk icon which will be located on their desktop

4. The following window will pop up on their computer:
You will need to open the AnyDesk program on your computer as well.

5. When the clients AnyDesk window opens, give them the “AnyDesk-Address” from your window and have them enter it in to the Remote Desk box on their computer screen.

6. You will then give them access to your computers screen

7. They can now see and hear everything that you do during the session, you can even allow them to have control over all or part of the session.

8. However, in order to SPEAK with the client, you will need to do so with a phone connection

Ao Scan Remote

Establish the connection, Before starting the AO Scan program...

Have them place the AO Scan Bio-Transducing Headset on their head as shown in their manual,

1. Have them attach the USB cable between their AO Remote Module and their computer
2. Have them connect the Bio-Analyzing Headset cable to the jack in the front of the unit
3. Have them connect the audio extension cable from the AO Scan Remote Module input jack on the back to their Audio headphone jack on their computer

You can now run a remote scan with the client.

At the conclusion of the remote session,

You will you will both close your AnyDesk programs. Which will immediately terminate the remote session and the client will no longer have access to your computer.

The Theory behind the S.E.F.I.

The S.E.F.I. program is based on the principles of Radionics coupled with modern electronic technology and advanced software programming allowing anyone with a little instruction to start to use and harness this wonderful and exciting energy.

The following is a brief explanation of Radionics written by a researcher in St. Louis, MO.

Radionics Definition:

Radionics is the utilization of an unusual energy or energies in devices to produce natural phenomenon or effects. J.G. Gallimore

Radionics:

System of alternative medicine developed by Dr. Albert Abrams, who believed that diseased body tissue affected the nervous system and gave forth, 'dull emanations'. Abrams believed electronic phenomena were involved with this, and he invented a variable resistance instrument called a 'black box' to measure the ohm resistance of different diseases on an electronic circuit. He found for example, that cancer produced a 50-ohm resistance, while syphilis had a 55-ohm resistance. Abrams later modified his technique so he could take readings from a drop of blood. In 1924, a committee established by the Royal Society of Medicine investigated Abrams techniques and were favorably impressed. Today Radionics and its cousin Radiesthesia (medical dowsing) are recognized in Europe as legitimate medical procedures.

This is the beginning of Forum type articles that will be covering all aspects of the 'Ether'. Which includes 'orgone energy', 'pyramid energy', 'tantric energy' 'kundalini energy' and all other forms of 'unusual' energies that modern day science is still trying to understand?

It is simply an attempt to inform others that these energies exist and that they can be made available for your own use as well becoming more comprehensible to the layman. This is NOT a technically oriented forum, so should someone attempt and try to use technical terms...It will just make things that much harder on others who have no formal training in Physics, chemistry, etc., This forum is for the LAYMAN! But any and all persons 'of the scientific persuasion' are ENCOURAGED to join in, just keep things 'simple'. Thank You!

Though I am starting this communication I do not feel that I am required to always contribute to it...Whereas all persons have knowledge, ideas and opinions, I feel that this discussion be 'open' and may accept input from all persons. I will expect others to send questions & answers also. I will monitor the communications and answer the questions to the best of my knowledge and to the limits of my resources. This is a discussion for 'unusual energies', so I will expect some unusual questions and answers!

Appendix C

Basics of Radionics

Radionics has as its basis the following: There is an energy pervading the universe that has unusual properties and may be used for the betterment of mankind. Under certain conditions, this energy has been found to affect man or his environment and can be controlled under conditions imposed by the characteristics of that energy.

As in all sciences, development of that science is made through observation of properties or characteristics of that which is studied. Experimentation follows observations in order to control or induce the phenomenon itself in a controlled manner.

Ether

The 'Ether' as it is often called is the carrier of Radionics and PSI energies. To demonstrate that the 'Ether' actually exists it is necessary to demonstrate it scientifically. Here follows some very simple experiments to prove the existence of etheric forces, or 'bio plasmic energy' as it is called in Russia.

1. Ether Absorption Test in Sprouting:

Take a clear test tube and insert a piece of sterilized cotton saturated with distilled water. Put a bean or pea in the initial stage of germination inside the tube and seal it carefully with a glass stopper and wax, making it absolutely airtight and moisture proof. If we compare the weight of the test tube after this initial preparation with the weight in a few weeks hence (after the seed inside has sprouted), we will find a considerable GAIN OF WEIGHT, which simply cannot be explained by contemporary physical laws or theories. The gain in weight can be demonstrated with even a small letter scale, no laboratory precision scale is needed.

2. Ether Transmutation Test in Sprouts:

But a follow-on test is even more revealing. A careful chemical analysis of the seed, which has sprouted in the sterile environment of the sealed test tube as compared with an identical seed, will prove the sudden appearance of NEW CHEMICAL ELEMENTS IN THE SPROUT, which also cannot be logically explained by contemporary textbook science. The mineral substances found in the sprouting seed will show a gain of 20 to 100% over the identical seed BEFORE the test. We know the tube was sterile, the water was distilled and contained no minerals, and no mineral substance can penetrate the glass wall of the test tube.

Appendix C

Explanation:

The only logical explanation for these surprising results is of course the assumption of the existence of ‘formative’ or ‘etheric forces’ which are able to penetrate the ‘finer media’ postulated by the esteemed Mr. Hieronymus. Around 1879 a German scientist named Von Herzelee had proved in more than 500 analyses that the mineral substances thus found in organic substances originate in a way comparably to alchemistic procedures. His published claims so outraged the scientific, materialistic oligarchy of his day that his writings vanished from the libraries -- (shades of Dr. Wilhelm Reich!)-- It took a student of Dr. Rudolf Steiner, a medical doctor named Dr. Rudolf Hauschka, many years of intensive efforts to locate the writings of Von Herzelee in an obscure small library in Berlin. After WWII Dr. Hauschka proceed to publish his own findings. Since then the postulate of ‘etheric space’, of a ‘dynamic space fluidum’ has since spread on the continent and is gaining recognition. Although the terminology in the field is still somewhat confused, the Russians for instance decided to call it ‘bio plasmic energy’, and other nations coined still different terms---the basic facts remain the same.

Examples:

As an example, there is the case of Theresa von Konnersreuth, a German peasant girl who astonished people for decades in our century, not by speaking Aramaic when in a state of ecstasy, but by her demonstrated and verified ability to survive for many years without the intake of food! Although she had a glass of water per day, most people were ready to discount the reports as ‘hoaxes’, disregarding, as usual, the sworn statements of her physicians!

General Information:

It is generally accepted that the body has an energy field around it. This belief is held even without the proof of science, although VAST research is being conducted. Small groups of people believe that this energy can be conducted along a wire or conductor into a device that will allow measurement in a subjective manner, which is by using the human body response to this energy to determine a result. Generally without indication of the intensity of energy, information is determined by ‘frequency’ changes of this energy. Radionics is the utilization of an unusual energy or form of energy to produce desired effects.

Inclosing:

The energy is PRE PHYSICAL in that it is the force field around matter, thus detection, tuning, and transmission comprise the art of Radionics. The energy itself has two polarities which are spiral twined together, or may exist separate. These energies may divide into two more that are generally locked into matter.

Appendix D

It is not uncommon for one to refer to the events of or existence as “the dance of life”. Everything from a community, to an ecosystem, to a galaxy is engaged in an eternal cycle of energy exchange. These energy exchanges are evidenced by things like light, electricity, and physical matter.

Another of these types is that of sound. Just as there are various wavelengths of light, some of which are perceptible to us and others, which are not, there is a similar scale of sound all around us and inside of us that always has a specific tale to tell. A simple example like a dog whistle will suffice to show us that certain sounds exist which, while inaudible to us, are screeching to the dog. Also, the harmony of sound is so dynamic that bats are able to use it as a means to navigate in the dark. If such sound can paint the picture for a bat about its surroundings, similarly it should be able to paint a picture about its interior, and such is the case with us as well.

A rumbling stomach tells the story that we are hungry; while a thumping heart may tell the story that we are nervous or excited. And similarly the sounds of the body become more and more faint, until they become imperceptible to the human ear. Thus we understand that simply because we can no longer hear a thing inside of us, it is not to mean that it is producing no sound.

Unenergetically speaking, vibration causes sound. When two things collide together, even if those two things are simply a particle and the space against which it vibrates, they produce sound.

Therefore, every part of you from the organs down to the atoms of your body produce sounds.

Together, these sounds produce a symphony, that symphony being the story of your health as told by your voice. The aggregate sum of health and/or disease within the system of your body is expressed through the combined intonations of your voice.

Is it so hard to believe? Consider how we can perceive an array of emotions ranging from fear to love, from anger to joy, etc. within the tones of a single person’s voice. It’s not what they say; it’s how they say it. Using our same logic, it is absurd to assume that since certain emotions or states of being are not easily perceived through a person’s voice that they must not be there. They are.

Appendix D

Often times we can hear conditions such as guilt or fear in a person's voice when an experience is recent. However, time tends to suppress those emotions, and those intonations become a permanent part of that person's voice expression, to the point where they become integral and indistinguishable part of the person's voice. The task then becomes, how do we intelligently decipher the person's voice, in order to decipher the person? Physically, emotionally, etc.

Since everything even down to a particle produces a sound of its own, we are able to analyze the human system at even beyond a cellular level, past the particle level, and into the energetic/emotional level through a simple voice analysis.

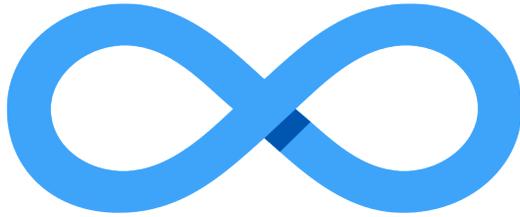

The AO Scan will take a sample of your voice, and after having assessed the deficiencies and/or over-compensations in your tones, will produce an accurate depiction of your physical and emotional condition.

For example, if you strike a hollow steel pipe, you will get an entirely different sound than if you strike a solid steel rod. Likewise, the voice analyzer is able to determine something like the amount of calcium in your bones, whether your bones may be too stiff with calcinations or too brittle without it, by deciphering the sound put out by your voice. This same process is done with the conditions of your organs, the levels of substances and chemicals in your body, and the levels of efficiency with which your system functions.

Emotionally and mentally, the INNER-Voice Analyzer provides a picture of your condition as well. In the well known experiments undertaken by Dr. Masaru Emoto, he shows that a basic substance like water is affected by words, pictures, etc. by forming either distorted crystalline structures when froze, or beautiful geometric figures, according to the type of stimuli supplied. In some cases, the type of music that was applied generated the response. Music, tones, and words are the means by which the water reacted. It is not difficult to see how we, being composed mostly of water, have such a tendency to be affected by tones. The voice analyzer takes the symphony of our voice and then in turn generates a sympathetic tone that will counteract our deficiencies.

One then takes the mathematically generated tone that will balance out or inner disparities, and after having listened to this computer-generated tone for about two minutes, will feel a remarkable and instantly noticeable change in mood, disposition, and of course, tone of voice.

The immediacy with which this device produces literal changes is amazing. One will undeniably feel better after being exposed to a customized program. The entire process of having your voice analyzed and having a supplemental harmonic produced takes around ten to fifteen minutes, and the voice analysis will include details on your particular condition at that time, ranging from a comprehensive physical to an emotional analysis.

Troubleshooting

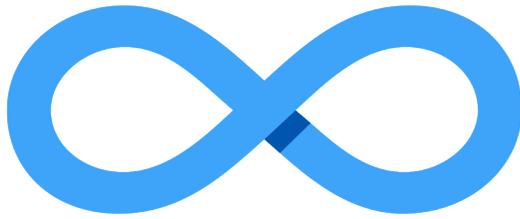

Some of the most common issues:

1. The Main Power switch does not turn on the Computer?
 - a. Check to make sure that the power cord is securely plugged into both the wall socket and the power socket on the back of the device.
 - b. Make sure that the power switch on the power jack on the back of the device is in the ON Position.

2. License Code Error Message?
 - a. Reset the AO Scan encryption module, by unplugging the usb and then re-inserting it.
 - b. If you are using an Anti-Virus program on the computer, such as PC-Matic, make sure that it is checked “OFF” until reboot. This is done by:
 - I. Clicking on the small UP arrow in the bottom right side of the tool bar
 - II. It will open the Hidden Icon Box, LEFT click on the PC Matic Icon
 - III. Click on the Protection Level
 - IV. Click on the “Off Until Reboot”

3. When running a SEFI program there is no sound or lights in the SEFI Chamber?
 - a. Make certain that the A/O Power switch is ON.
 - b. Make certain that the sound is not going to the monitor. Check the control panel of the computer and select the audio output to computer speakers not the HDMI output.

4. When performing a Remote Scan with a client, they get an Error Message that states that their system is not compatible with mine?
 - a. Make certain that they are running AnyDesk.
